XP FACTORY

Introduction

On 13 September 2018, the board of XP Factory plc (formerly Escape Hunt plc) decided to apply The QCA Corporate Governance Code (2018 edition - the QCA Code). We believe that the QCA Code provides us with the right governance framework: a flexible but rigorous outcome-oriented environment in which we can continue to develop our governance model to support our business.

The Quoted Companies Alliance (QCA) – Ten principles of Corporate Governance

1. Establish a strategy and business model which promote long-term value for shareholders
2. Seek to understand and meet shareholder needs and expectations
3. Take into account wider stakeholder and social responsibilities and their implications for long-term success
4. Embed effective risk management, considering both opportunities and threats, throughout the organisation
5. Maintain the board as a well-functioning, balanced team led by the chair
6. Ensure that between them the directors have the necessary up-to-date experience, skills and capabilities
7. Evaluate board performance based on clear and relevant objectives, seeking continuous improvement
8. Promote a corporate culture that is based on ethical values and behaviours
9. Maintain governance structures and processes that are fit for purpose and support good decision-making by the board
10. Communicate how the company is governed and is performing by maintaining a dialogue with shareholders and other relevant stakeholders

Application of the QCA Code and required disclosures in our annual report or on our website

The correct application of the QCA Code requires us to apply the principles set out above and by answering the specific requirements of each of the 10 principles which we have done below and also to publish certain related disclosures. These can appear in our annual report, be included on our website or we can adopt a combination of the two approaches.

Recommended locations for each disclosure are specified in the QCA Code; we have chosen to follow these recommendations.

Disclosure requirements to ensure conformity with the 10 QCA principles

Principle 1. Establish a strategy and business model which promote long-term value for shareholders

ANNUAL REPORT & ACCOUNTS DISCLOSURE: Explain the company's business model and strategy, including key challenges in their execution (and how those will be addressed)

XP Factory complies with this principle in the 2021 Annual Report and Accounts and this is set out in the Strategic Report on Pages 6 – 22. The Group's strategy, business model and challenges are fully explained within this Strategic Report. Further detail on the strategy, business model and challenges for the enlarged group is provided in the Interim Results for the six months to 30 June 2022 dated September 2022.

XP Factory has set out its strategic objectives for 2022/2023 and beyond in four categories:

1. Consolidate the UK footprint through a combination of direct investment and brand consistency projects, together with steady growth in the network of venues across both brands
2. Develop a platform for growth in international territories, focusing on franchise
3. Continue the development of new products and markets which facilitate the growth of B2B sales
4. Invest in infrastructure and systems that support scale and future growth, that provide business insights help develop sustainable differentiation across the group's brands.

Each of these components is important to the strategy and future success of the Group. In addition, the principal risks and uncertainties to the successful delivery of the Company's strategy, identified by the Board. The Board reviews key risks to the delivery of the strategy together with the appropriate actions being taken, at each board meeting.

Principle 2. Seek to understand and meet shareholder needs and expectations

WEBSITE DISCLOSURE: Explain the ways in which the company seeks to engage with shareholders and how successful this has been. This should include information on those responsible for shareholder liaison or specification of the point of contact for such matters

We have a programme of individual meetings with institutional shareholders and analysts following the preliminary and half-year results presentations to the City. These meetings allow the Chief Executive and the Chief Financial Officer to update shareholders on strategy and the Group's performance. Additional meetings with investors and / or analysts are arranged on request. All board members receive copies of feedback reports from the City presentations and meetings, ensuring they are aware of shareholder opinion. The Company also on occasions presents at investor forums in person or online, which are aimed at retail shareholders.

In addition, page 28 of our 2021 Annual Report and Accounts within the Corporate Governance Report there is a section entitled "Communication with shareholders" which meets all the points above apart from detailing the success of this shareholder engagement and who the IR points of contact are. These points are addressed below and are included in the text of the section from our Annual Report and Accounts which is extracted below:-

Communication with shareholders: The Board attaches great importance to communication with both institutional and private shareholders.

The Board attaches great importance to communication with both institutional and private shareholders. Regular communication is maintained with all shareholders through Company announcements, the half-year Statement and the Annual Report and financial statements. The Directors seek to build on a mutual understanding of objectives between the Company and its shareholders. Institutional shareholders are in contact with the Directors through presentations and meetings to discuss issues and to give feedback regularly throughout the year. With private shareholders, this is not always practical. The Board therefore uses the Company's Annual General Meeting as the opportunity to meet private shareholders who are encouraged to attend, and at which the Chief Executive Officer will usually give a presentation on the activities of the Company.

Following the presentation, there will be an opportunity to ask questions of Directors and to discuss the development of the business. The Company operates a website at <https://xpfactory.com/investors>. The website contains details of the Company and its activities; regulatory announcements, Company announcements, Interim statements, preliminary statements and Annual Reports. The website is maintained in compliance with AIM Rule 26.

The primary responsibility for IR rests with the CEO, Richard Harpham, and CFO, Graham Bird. They are supported by a consultant, Kam Bansil, whose role largely encompasses investor relations and is the first port of call for investor queries. Richard Rose, as the Chairman, and the other Non-Executive Directors are all willing to engage with shareholders should they have a concern that is not resolved through the normal channels.

Principle 3. Take into account wider stakeholder and social responsibilities and their implications for long-term success

WEBSITE DISCLOSURE: Explain how the business model identifies the key resources and relationships on which the business relies. Explain how the company obtains feedback from stakeholders and the actions that have been generated as a result of this feedback (e.g. changes to inputs or improvements in products)

The key resources and relationships on which the business relies are our customers, staff, shareholders, regulators, franchisees, prop-suppliers, builders for our site fit outs, landlords for our sites, content providers, and creditors. Shareholders are able to contact management directly via the web portal contact email, monitored by the Directors of the Company, or telephone numbers disclosed on regulatory announcements.

We obtain feedback from our stakeholders on a regular basis, in particular from our customers both directly and via public review forums such as TripAdvisor™. We have daily contact with our franchisees and have established an online forum through which ideas and issues can be shared; we meet our builders and game suppliers on a daily/weekly basis and have regular reviews. Contact with potential content providers is driven by contractual arrangements. We obtain feedback from our institutional shareholders meetings organised by our brokers. Our design of new games is an iterative process with important feedback on a regular basis from franchisees, our site-staff, the design team and our suppliers. This enables us to improve our design process and quality and cost of production.

The Company has very little negative impact on society, local communities or the environment, so it is unlikely that these issues will affect the Company's ability to deliver shareholder value.

Principle 4. Embed effective risk management, considering both opportunities and threats, throughout the organisation

ANNUAL REPORT & ACCOUNTS DISCLOSURE: Describe how the board has embedded effective risk management in order to execute and deliver strategy. This should include a description of what the board does to identify, assess and manage risk and how it gets assurance that the risk management and related control systems in place are effective

The "Principal Risks and Uncertainties" of the XP Factory business are set out at pages 16 to 19 of the Company's 2021 Annual Report and Accounts. A risk register was created at the time of the IPO and is updated and remedied annually. This outlines the process for identifying, assessing and managing risks in order to execute and deliver strategy. The management meet most days and at least weekly and the process for identifying and managing risks are discussed at this forum. It is also a forum for emerging risks to be identified. The key risks that the business faces are discussed at board meetings and management meetings. Our auditors provide assurance over the annual report and financial statements, their reporting to the audit committee informs our assessment of how financial risk has been managed.

Principle 5. Maintain the board as a well-functioning, balanced team led by the chair.

The CFO receives regular updates on financial standards and attends seminars as required and receives advice from the Company's auditors, its financial and legal advisers, and innovation and tax advisers.

All the NEDs have board positions in other companies. Richard Rose is the Chairman of several boards offering guidance and direction, Martin Shuker currently does not serve as a director on the boards of any other companies, and Philip Shepherd serves as an executive director on the board of one other company and as non-executive director on the boards of 5 other companies, including XP Factory plc.
